

Backup & Instant Recovery Software

With 3.5" HDD Case

Designed for easy-to-use backup and instant recovery, the EXB-0131 requires just a few simple steps and all of your operating systems, programs, e-mails, pictures, and other data are backed up or restored. It is the perfect backup solution for PC power users and home users who value their data and time. Data is safeguarded by the EXB-0131's simple to use one-touch button, which launches automated backup software. In the event of hard drive failure or data loss, you can boot directly from an external USB backup drive and replace your failed hard drive. No more long restoration times or steps to deal with - the EXB-0131 is the perfect choice for speedy and reliable recover or back-up.

Sit back and relax while your system is rebooting. Once your system is ready, it will be just like your previous working environment and you can continue your work again.

Also Available for 1.8" and 2.5" HD sizes

Special Benefits of the Exboot Recovery System

- :: Minimal Downtime: In just a few simple steps, and without the time-consuming installation and configuration of the operating system, you can always boot directly from the external EXB-0131, and promptly get back to work.
- :: Backup Verification: Unlike other backup software, which takes much effort in order to verify if the backup was successful or not, you can always verify your backup by booting from the EXB-0131.
- :: Compatibility Test: Whenever an upgrade or service pack for the operating system or application software is needed, the EXB-0131 allows for execution of these programs on the EXB-0131 itself. Once successful, you can easily transfer your system.

Features

Fast Backups

- Backup** All your data, operating system components, and applications are backed up by a customizable onetouch button or scheduled automatic backups.
- Incremental Backup Synchronization** Save your time and protect your drive by backups for only new and modified files after the first full backup. Automatically checks and synchronizes to ensure files are up-to-date.

Quick Recovery

- External Bootup** Offers a quick recovery by booting up from a USB 2.0 interface storage device.
- Total Recovery** Recover all your operating system components, application programs, and valuable data like previous status.

Easy Administration

- One Touch Button** Just press the button and your files are backed up in one simple step.
- Flexibility** Choose your own hard drive in various capacities for your data management.
- Scheduling** Simply set up an automatic backup schedule by date and time.
- Versions** Users can access and restore previous versions of files anytime.
